Ability to sell, manage and drive growth

Good relationship management skills

Ability to be tolerant to both my mistakes and others considering them as challenge

I am a dedicated and ambitious student at Turiba University, pursuing a degree in Computer Systems. I am passionate about technology, with a particular interest in software development, cybersecurity, and system architecture. I continuously seek opportunities to broaden my knowledge and enhance my technical skills through hands-on projects, internships, and independent learning.

My strong communication skills and ability to collaborate effectively make me a valuable team member, capable of leading or contributing to group projects with confidence. I am adept at problem-solving, adapting quickly to new challenges, and applying innovative approaches to

technical issues. I thrive in fast-paced, dynamic environments where I can contribute to meaningful projects and learn from industry professionals.

"I remain flexible when faced with challenges, adjusting my mindset and strategies to overcome obstacles and maintain productivity."

In addition to my academic pursuits, I am actively involved in extracurricular activities and always open to professional development opportunities, including hackathons, workshops, and networking events. I am eager to take on new challenges and make a positive impact in the field of technology.
